3	POLLUTION EVALUATION AND HEALTH RISK ASSESSMENT OF HEAVY METALS IN STREAM WATER AT EAST AKIM MUNICIPAL ASSEMBLY, GHANA	15-22
4	PROFILE COMPOSITION AND RISK EVALUATION OF PAHS IN BOREHOLE WATER FROM AMASSOMA, BAYELSA STATE, NIGERIA	23-30

Environmental Contaminants Reviews (ECR)

Editorial

The universe is an amazing place. It is vaster than it is possible to measure, stranger and more magical than any science fiction or fantasy, more beautiful than any art, and far more complex than can ever be imagined. Studying the universe – studying science – whether that is on the grandest scales of cosmology, the smallest scales of quantum physics and subatomic chemistry, or the beautiful complexity of life, is to set yourself on the path to an adventure that will stay with you forever. The most beautiful thing we can experience is the mysterious. It is the source of all true art and science. Science is beautiful when it makes simple explanations of phenomena or connections between different observations. Examples include the double helix in biology and the fundamental equations of physics. New discoveries in science will continue to create a thousand new frontiers for those who still would adventure
